## EXPERIENCE

Software Tester

Pivotal Poland

April 2023 – Present      Warsaw, Poland

In my current role, I am working with a client from the banking sector on a project that involves:

- Designing and executing test scenarios based on documentation
- Coordinating UAT process, ensuring team synergy
- Preparing testing documentation for comprehensive result analysis
- Providing end user training to ensure efficient application utilization
- Collaborating with the development team to identify and locate potential issues

Software Tester

EY GDS Poland

January 2022 – March 2023      Warsaw, Poland

I was a part of the team responsible for quality assurance for an offshore client within the insurance sector. My duties include but are not limited to:

- Analyzing, designing, and executing test cases.
- Creating test scenarios.
- Conducting software tests (functional, regression, unit, retests).
- Supporting and coordinating work with other testers.
- Participating in sprint planning sessions.

QA Technician

Testronic Sp. z o.o.

September 2020 – December 2021      Warsaw, Poland

My duties included, among others:

- Determining and analyzing the root causes of errors.
- Tracking and managing software defects.
- Providing technical support for clients
- Collaborating closely with fellow testers and developers.

Site Engineer

Climatic Sp. z o.o. sp. k.

September 2019 – June 2020      Warsaw, Poland

My primary task was to supervise and coordinate works on the construction site for the entire investment process.
